This is a sub version patch for some UI issues found in the last release.

2 Bug Fixes

The following issues have been resolved in this release.

2.1 Reporting Platform - Prior Reports

Issue: A change for handling interim reports affected the reporting page retrieving prior reports from the server.

Resolution: The query URL used to get the prior reports has been modified.

2.2 Reporting Platform - Document Auto Selection

Issue: When opening an item to report, the last document was selected by default.

Resolution: Updated the logic to select the first relevant document automatically.

3 Known Issues

3.1 Max PDU Value

Issue: It has been observed that in some cases, a restart of the service can result in the Max-PDU field in the DICOM Listener Node becoming populated with the default user name which can cause an issue with communications.

Workaround: Clear the field and re-apply the config.
