

Nexus Release Notes

Version 3.04.04

Pukka-j Limited

1 Version 3.04.04

Release Date: June 24, 2024

2 Introduction

This is a sub version update for some reporting UI refinements and Nexus look and feel updates. There are no changes to the primary library files, just nexus.jar and cloe.js.gz.

3 Improvements

3.1 Nexus UI

The pixel scaling on monitors has now been taken into account when displaying the Nexus UI to make the buttons, icons and titles much clearer.

3.2 Reporting Documents Viewer

The tool for viewing electronic documents on the reporting screen has been significantly improved to provide better pan and zoom support along with a better full screen option on the specific document being viewed.

4 Bug Fixes

No bug fixes

5 Known Issues

No known issues.

6 Installation Instructions

Before making any changes, the **docs** and **lib** folders in the install directory should be backed up along with the **nexus.jar** in the install root.

The libraries required for this release are:

nexus.jar	3.04.04
pjk.jar	1.19.19
pacsoology.jar	1.23.00
mint.jar	1.26.01

Plugin library versions are:

anon.jar 1.12.05

broker.jar 1.12.00

redact.jar 1.11.03

For Origin users:

websocket.jar 1.12.02

An update MySQL library is potentially required depending upon the MySQL service.

The UI is updated via the files:

cloe.js.gz

pj.css

The jar files need to be replaced in the lib folder the install folder apart from the nexus.jar which is located in the root of the install folder. The html files, cloe.js.gz and the css files should be replaced in the docs folder within the install folder. The new login page/background files should be place in docs/config/login folder in the install location.

Contact support@pukka-j.com for any help in apply the update.
